Priority	2017 Progress to Date	Implementation Partner (Please select one partner from the dropdown list per row)	Partner Role(s)	Strengths	Challenges? How will they be addressed?	Focus Area	Goal	Objectives	Disparities	Interventions/ Strategies/Activities	Family of Measures
Prevent Chronic Diseases	1 O'Connor Hospital employee was trained to conduct chronic disease self management classes.		n/a	n/a	The one employee who was trained was unable to host any classes because of personal health issues. The organization was not able to find other staff who could complete the necessary training and conduct classes. O'Connor Hospital will not be completing this activity.	Increase access to high quality chronic disease preventive care and management in both clinical and community settings	Promote culturally relevant chronic disease self-management education	Patients with Chronic Disease or and/or their caregivers will learn ways to manage their disease.		Two six week Stanford University Chronic Disease Self- Management programs (CDSMP) will be offered annually.	Number of CDSMP programs offered.
Prevent Chronic Diseases	O'Connor Hospital was not able to offer chronic disease self management classes.		n/a		The one employee who was trained was unable to host any classes because of personal health issues. The organization was not able to find other staff who could complete the necessary training and conduct classes. O'Connor Hospital will not be completing this activity.	Increase access to high quality chronic disease preventive care and management in both clinical and community settings	Promote culturally relevant chronic disease self-management education	Patients with Chronic Disease or and/or their caregivers will learn ways to manage their disease.			Number of participants initiating and completing program.
Prevent Chronic Diseases	O'Connor Hospital was not able to offer chronic disease self management classes.		n/a		The one employee who was trained was unable to host any classes because of personal health issues. The organization was not able to find other staff who could complete the necessary training and conduct classes. O'Connor Hospital will not be completing this activity.	Increase access to high quality chronic disease preventive care and management in both clinical and community settings	Promote culturally relevant chronic disease self-management education	Patients with Chronic Disease or and/or their caregivers will learn ways to manage their disease.		Hold at least 1 Chronic Disease Self- Management Program Peer Leader Training.	Number of participants completing peer leaders training
Prevent Chronic Diseases	A total of ten municipalities (including SUNY Delhi and the County Board of Supervisors) have Complete Street policies in Delaware County. The Complete Street committee met three times in 2017. The group focused on a county wide Complete Street policy, developing walking maps for four municipalities. The maps will include	Advocates	Sharing presentation tools and information such as liability information among Complete Street group partners. Supporting one another by offering feedback on presentation strategies. Inviting additional members or topic experts to the meeting as appropriate.	Committed diverse group comprising of Chambers of Commerce, Fitness advocates, municipalities, hospitals, health advocates, concerned citizens	Financial burden of cost of projects, lack of time to meet continue to be challenges. No mitigation has been identified.	Reduce obesity in children and adults	Create community environments that promote and support healthy food and beverage choices and physical activity.	Three (3) municipalities will pass Complete Streets policies by 12.31.18; One (1) municipality will complete a Complete Streets project by 12.31.18.; increase percentage of adults who participate in leisure time physical activity from 75% to 76% by 12.31.18.	rural residents living below the poverty level	Increase the number of municipalities that have Complete Streets policies.	Number and percent of residents that reside in jurisdiction with Complete Streets policies, plans, and practices.
	A total of ten municipalities including SUNY Delhi have passed Complete Street policies. The County Board of Supervisors passed a Complete Street resolution in support of Complete Streets making all county roads eligible for Complete Street project improvements. A total road	Advocates	Sharing presentation tools and information such as liability information among Complete Street group partners. Supporting one another by offering feedback on presentation strategies. Inviting additional members or topic experts to the meeting as appropriate.	Committed diverse group comprising of Chambers of Commerce, Fitness advocates, municipalities, hospitals, health advocates, concerned citizens	Financial burden of cost of projects, lack of time to meet continue to be challenges. No mitigation has been identified.	Reduce obesity in children and adults	Create community environments that promote and support healthy food and beverage choices and physical activity.	Three (3) municipalities will pass Complete Streets policies by 12.31.18; One (1) municipality will complete a Complete Streets project by 12.31.18.; increase percentage of adults who participate in leisure time physical activity from 75% to 76% by 12.31.18.	rural residents living below the poverty level	Increase the number of municipalities that have Complete Streets policies.	Percent of roads in a jurisdiction that become subject to Complete Streets policies, plans, and practices.
	10 municipalities including SUNY Delhi have signed Complete Street Policies. After the county passed a Complete Street policy other municipalities are now interested in passing policies.	Advocates	Sharing presentation tools and information such as liability information among Complete Street group partners. Supporting one another by offering feedback on presentation strategies. Inviting additional members or topic experts to the meeting as appropriate.	Committed diverse group comprising of Chambers of Commerce, Fitness advocates, municipalities, hospitals, health advocates, concerned citizens	Financial burden of cost of projects, lack of time to meet continue to be challenges. No mitigation has been identified.	Reduce obesity in children and adults	Create community environments that promote and support healthy food and beverage choices and physical activity.	Three (3) municipalities will pass Complete Streets policies by 12.31.18; One (1) municipality will complete a Complete Streets project by 12.31.18.; increase percentage of adults who participate in leisure time physical activity from 75% to 76% by 12.31.18.	rural residents living below the poverty level	Increase the number of municipalities that have Complete Streets policies.	Number of municipalities where new or enhanced policies, plans and practices that promote Complete Streets are proposed.
	O'Connor Hospital completed work on a campus fitness trail complete with five fitness stations working the major muscle groups in various ways. The Complete Street committee toured the trail and assist in publicizing the trail.	Other (please describe partner and role(s) in column D)	Promoting the use of the O'Connor Hospital fitness trail	Other municipalities and organizations are interested in building or supporting similar fitness trails in their area or on their property.	A trail counter was placed on the trail, however, taking into consideration seasonal effects it will take a full year or more to assess the use of the trail. Does require funding. Between September 1- November 30 over 400 users were on the fitness trail.	Reduce obesity in children and adults	Create community environments that promote and support healthy food and beverage choices and physical activity.	Three (3) municipalities will pass Complete Streets policies by 12.31.18; One (1) municipality will complete a Complete Streets project by 12.31.18.; increase percentage of adults who participate in leisure time physical activity from 75% to 76% by 12.31.18.	rural residents living below the poverty level	Advocate for and advertise newly constructed or maintained safe sidewalks, bike lanes, recreational facilities, parks, and other amenities.	Number of newly constructed infrastructure to support alternative transportation.
	The Town of Colchester (Downsville Hamlet) has added fitness stations to a municipal recreation area. The town also has plans to make additional improvement including connecting the school grounds to a municipal park via a bridge in the coming year. The town	Advocates	Giving suggestions for funding sources. Promoting the use of the trail and municipal park resources.	Engaged community leader (Town Supervisor). Local and motivated individuals in the town that want change.	Funding opportunities. This particular town is located in the New York City Water shed and strict building regulations apply, impacting the work the town can do to build or improve infrastructure for biking, hiking or other recreational pursuits.	Reduce obesity in children and adults	Create community environments that promote and support healthy food and beverage choices and physical activity.	Three (3) municipalities will pass Complete Streets policies by 12.31.18; One (1) municipality will complete a Complete Streets project by 12.31.18.; increase percentage of adults who participate in leisure time physical activity from 75% to 76% by 12.31.18.	rural residents living below the poverty level	Advocate for and advertise newly constructed or maintained safe sidewalks, bike lanes, recreational facilities, parks, and other amenities.	Number of municipalities who have implemented strategies that support cycling and walking.
	Little progress has been made on this project. It is difficult to sustain this initiative in doctors offices because it requires additional work from staff. Will most likely phase out program in coming year(s).		n/a	The getoutandwalk.org website is still active and updated. People love the idea of doctors placing an emphasis on physical activity by prescribing physical activity to patients.	Difficult to implement in doctors offices because office staff have so many important initiatives to track and do. Some providers have little buy in because it is seen as another thing to do. Difficult to maintain excitement and funding to pay for brochures, maps etc.					Sustain utilization of Prescription Trails Program through: 1) promotion of Get Out and Walk website; 2) implementation of a tracking system which uses smart phrases in the Electronic Medical Record (EMR); and 3) identification and demarcation of existing trails.	Number of EMR systems which implement tracking system.
