

Dermal Fillers

Dermal fillers, like Juvederm, are injections that are typically used to improve the appearance of the face. Among other benefits, these injections can be used to:

- Plump thin lips and cheeks
- Enhance shallow contours
- Soften facial creases and wrinkles
- Improve the appearance of recessed scars
- Rebuild minor differences in facial symmetry

Rejuvenate Your Skin!

As part of our comprehensive range of dermatology services, the Bassett Dermatology Department offers elective cosmetic options including laser treatments, Botox® injections, and fillers such as Juvéderm®. If you're looking to enhance your skin's natural radiance, our board-certified dermatologists and accomplished team are here to provide you with the highest standard of care.

When it comes to your skin health, trust the experts. Get cosmetic treatments in a safe, comfortable environment with the high-quality standards that only an expert medical team can provide.

Book a Consultation!

At your introductory appointment, one of our experienced dermatologists will work with you to discuss your skincare goals and create a personalized treatment plan.

Call (607) 547-7615 to get started.

What Cosmetic Services Does Bassett Offer?

Aesthetic Laser Treatments

Intense Pulsed Light (IPL) laser treatments are a safe, non-invasive solution for enhancing your skin's clarity, tone, and more. Using the innovative Nordlys® SWT® IPL and laser device, our dermatologists can effectively address skin concerns, including:

- Acne
- Age spots
- Broken capillaries
- Dark spots
- Freckles
- Irregular texture
- Leg veins
- Melasma
- Redness or rosacea
- Spider veins
- Sun damage
- Uneven pigmentation

Botox Treatments

Botox Cosmetic is an FDA-approved prescription injection for the temporary* reduction of moderate-to-severe fine lines and wrinkles in adults. Our dermatologists use precise injections to relax facial muscles to reveal smoother, rejuvenated skin.

In some cases, Botox injections can also be used for treating medical conditions including migraines, sweating, and overactive bladder. For medical Botox uses, please speak with your primary care practitioner for a referral.

*A single treatment usually lasts for 3-4 months.
