Descriptive Diagnosis:

PROVIDERS: Compliance is mandatory and regulated. For the laboratory to bill properly and receive payment, you must provide the specific Diagnosis codes for each outpatient test ordered. Additionally, only tests that are medically necessary for the indicated diagnosis or treatment should be ordered, with supporting documentation in the medical record. For tests included in each panel and reflexive testing, please refer to the back of the requisition form. Under current Medicare regulations, when certain laboratory tests (indicated by an *) are ordered, and the diagnosis is not listed in the Local Coverage Determination or National Coverage Determination for that test, payment may be denied. In these cases Medicare requires an Advance Beneficiary Notice (waiver of liability) be signed to allow the hospital to bill the patient. **All allergy tests have LCD's – please have the patient sign an ABN.**

☐ **Patient has signed ABN Waiver (ABN)**   ☐ **Patient refused to sign ABN Waiver (ABNR)**   ☐ **ABN not required**

➢ **Specimen Requirements**:
  1. Approximately 2ml of serum is needed for each 6 allergens ordered.
  2. The preferred tube type is the 7ml Red top tube. One completely filled 7ml Red top tube is sufficient for approximately 10 allergens.
  3. Allow the specimen to clot and centrifuge for 15 minutes.
  4. If the specimen is collected in a red top tube, the specimen must be centrifuged and the serum must be separated into a plastic aliquot tube.
