

LAB31135 Human Papillomavirus (HPV) with Genotype

BMC

Performing Location(s)

BMC

Reporting Name

HPV with Genotype

Specimen Source

Cervix

Specimen Required

ThinPrep Pap Test vials containing PreservCyt Solution

Minimum Volume

1 mL

Transportation Needs

Specimen Type	Temperature	Time
PreservCyt Solution	Ambient	3 months
(PAP)	Refrigerated	3 months

Storage Requirements

Specimen Type	Temperature	Time
PreservCyt Solution	Refrigerated (preferred)	3 months
(PAP)	Ambient	3 months

Causes for Rejection

Specimen in anything other than ThinPrep (PreservCyt)

Mislabeled or unlabeled specimen

Insufficient quantity of preservative

Leaked in transit

Sources other than cervix

Expired collection container

Reference Values

- HPV 16 – Negative
- HPV 18 – Negative
- HPV High Risk Other – Negative
 - High Risk Other Includes: 31, 33, 35, 39, 45, 51, 52, 56, 58, 59, 66, and 68.

Methodology

Polymerase Chain Reaction (PCR)

CPT Code

87626
